Guilherme Fischer

Senior Full Stack Developer

gfischer.com.br • guilherme@gfischer.com.br • LinkedIn

Santa Catarina, Brazil • +55 47 9843356844

Tech-savvy professional with comprehensive experience in designing, developing, and maintaining web and mobile applications across diverse technology stacks.

Proven success in navigating the full software development lifecycle, from conceptualization and design through deployment and optimization. Demonstrated expertise in both frontend and backend development, employing blend of programming languages and frameworks such as JavaScript, React, Node.js, PHP, and Python to create scalable, efficient solutions. Adept at collaborating with cross-functional teams, contributing to agile development processes, and implementing best coding practices. Skilled in translating complex requirements into functional, user-centric applications. Committed to leveraging technical skills to drive innovation, enhance user experience, and achieve business objectives.

Areas of Expertise

- Full Stack Web Development
- Agile & Scrum Methods
- Database Management
- API Development & Integration

- DevOps & Cloud Services
- Diagnosing & Troubleshooting
- Security Best Practices
- Regulatory Compliance

- Team Leadership
- Operational Efficiency
- Mobile Application Development

Career Experience

LIFEWIND, CHIEF EXECUTIVE OFFICER (FOUNDER)   **2022 - CURRENT**

Steer development and launch of LifeWind, mobile application dedicated to enhancing time management and quality of life for users. Devote weekends to progress this startup from its inception in late 2022 while overseeing all aspects of design, backend, testing, and frontend as a solo entrepreneur.

KEY ACHIEVEMENTS/CONTRIBUTIONS:

- Leveraged entrepreneurial mindset to establish and grow one-person company.
- Designed and developed comprehensive time management app, facilitating better daily routine organization for users.
- Executed full-stack development single-handedly, covering frontend to backend and testing for seamless user experience.

MYMINIFACTORY, TECH LEAD   **2021 - PRESENT**

Lead diverse projects across the MyMiniFactory platform aimed at enhancing both frontend and backend systems. Collaborate with CTOs, Product Owners, designers, and team members to refine platform features and direction. Enhance management skills through mentorship and strategic project leadership.

KEY ACHIEVEMENTS/CONTRIBUTIONS:

- Launched user forum, supporting thousands of users to foster community engagement and user interaction.

- Revamped payment system to increase revenue and streamline transactions for over a million users.

- Spearheaded addition of unit tests to elevate system reliability and improve payment processing efficiency.

- Refined content dashboard through statistics refactoring and unit test implementation.

MOLNIX, SENIOR DEVELOPER   **2020 - 2022**

Steered frontend and mobile team at Molnix, focusing on full-stack development. Enhanced team capabilities and personal expertise in diverse technological aspects. Drove cross-functional collaboration, liaising with product management, design, and QA teams to refine product features and resolve issues.

KEY ACHIEVEMENTS/CONTRIBUTIONS:

- Led development of critical software for notable organizations, including the Red Cross, integrating advanced features like user management and statistics tracking.

- Developed report generation feature for thousands of users aimed at improving data accessibility and decision-making.

- Introduced key functionalities in humanitarian aid software that enhanced user engagement and operational efficiency.

MULTITASK, FULL STACK DEVELOPER   **2017 - 2020**

Expanded developer skillset and gained valuable knowledge in infrastructure, transitioning to server-side development, networking, and support essentials for software and web applications. Contributed to Multitask's integration with Soft4 technologies, playing a pivotal role in software and application support.

KEY ACHIEVEMENTS/CONTRIBUTIONS:

- Resolved complex computer issues and spearheaded server setups, incorporating cloud systems, optimizing IT infrastructure, and ensuring seamless operations.

- Developed software solution for monitoring IP-connected devices, implementing alerts for critical thresholds like storage capacity.

SOFT4, FULL STACK DEVELOPER   **2016 - 2017**

Initiated professional journey at Soft4, focusing on development and support for service desk software. Played a key role in design and development of new features. Collaborated with the project team, including analysts, designers, and testers, to ensure seamless integration and alignment with project objectives.

KEY ACHIEVEMENTS/CONTRIBUTIONS:

- Achieved user satisfaction rates exceeding 90% through exceptional service quality and team performance.

- Customized new system modules for specific clients, improving product appeal and driving new client acquisition.

Additional Experience

Developer | Trainee, Joinville

HojeEuCaso – Freelance (system for finding suppliers for weddings all in one place)

VistoriaPrime – Freelance (system of inspections for renting houses)

SegScope – Freelance (system of inspections for insurance)

PX – Freelance (system for finding truck drivers)

Education

Postgraduate, Estacio (2021)

Unopar, College (2019)

Technical Skills

PHP, Laravel, Symfony, VueJS, React, HTML, CSS, React Native, Linux, Unit Tests, Tailwind, Bootstrap, Cypress, Docker, Infrastructure Tools
